

Accessories Mod. PAN-CENT

To speed read operations, sometimes more sensors are grouped in centralization panels from which, by connecting with portable reading unit via a supplied cable with the simple use of a channel selector, you can display data from all installed sensors.

The PAN-CENT instrument can collect up to 12, 4-wire connections. Each instrument is equipped with a multi-pole connector and a channel selector. Possibility of multiple connections of 12, for systems with 24, 36 or more channels.

Technical Specifications
